### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin L. Waugh on May 3, 2004.

2. The application has been amended as follows:
  - 2.1. In claim 27, line 11, the phrase "lactic acid, glycolic acid, and ether derivatives thereof," has been deleted.
  - 2.2. In claim 38:
    - a) line 2, "about" before "350" has been deleted.
    - b) line 3, "about" before "350" has been deleted.
  - 2.3. Claims 48-53 have been canceled without prejudice to their continued prosecution in a continuation application.

### **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

Upon careful consideration, Blasey, the closest prior art, fails to teach a multi-phase detergent tablet wherein the first phase, which comprises a cogranulated detergency additive composition comprising polymeric polycarboxylate and inorganic carrier, is formed by

Art Unit: 1751

compression at a pressure greater than that of the at least one second phase. Chun et al. (US Patent No. 5,133,892), a newly found art, teaches a multilayer detergent tablet containing an outer layer, a barrier layer and an inner layer (see abstract), wherein the same or different pressures are used for manufacturing the tablets, and wherein the outer layer is prepared at a pressure lower than the inner and barrier layers (see col. 19, lines 54-65). The outer layer, however, is the layer which contains a polycarboxylate and an inorganic carrier (see col. 22, lines 2846). Hence, even assuming the multi-phase detergent tablet of Blasey is prepared using the pressures disclosed by Chun, the layer comprising the polycarboxylate and inorganic layer is the layer which is prepared at a lower pressure than the inner and barrier layers which is the exact opposite of the limitations of the present claims. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the detergent art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lorna M. Douyon whose telephone number is (571) 272-1313. The examiner can normally be reached on Mondays-Fridays from 8:00AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
